Omar Ahmed Abou Elenien

Flutter Developer | Mobile & Software Engineer | AI-Assisted Development

Omarahmedv2@gmail.com +201064239345 Cairo, Egypt Portfolio LinkedIn GitHub

Professional Summary

Software Engineer with around 3 years of experience building and shipping Flutter applications for iOS and Android. Delivered 10+ apps across e-commerce, booking, education, pet services, farm management, social media, and AI-powered sports technology. Strong in Flutter architecture, REST API integration, Firebase, payments, testing, CI/CD, and App Store/Google Play delivery, with foundational Node.js/Express and database knowledge. Experienced with AI-assisted development workflows.

Notable Achievements:

- Shipped and maintained **10+ production Flutter apps** published on both the App Store and Google Play, across e-commerce, booking, education, pet services, farm management, and sports technology.
- Implemented **full localization and RTL layout support** for Arabic/English across multiple production apps.
- Applied **OWASP Mobile Top 10** practices including secure local storage, safe API key handling, and release build obfuscation.
- Resolved **30+ critical production issues,** improving stability, user experience, and release quality.
- Mentored **3 junior developers**, reducing onboarding time by **40%** and improving team delivery quality.

Professional Experience

Flutter Developer, Gamearound (Remote/Full-Time) January 2024 – Present
Related Projects: MobileHerd, JAiME AI Golf Coach, HD Cutz Salon, Poochiepoo, Trialist. London, United Kingdom

- Built and maintained **7+ production Flutter applications** across booking, education, pet services, farm management, and sports technology domains.
- Delivered features from product requirements through API integration, testing, release preparation, and production support while collaborating with product, design, backend, and QA teams
- Built an **AI-powered golf ball tracking feature** using Python, OpenCV, YOLOv8, and TensorFlow Lite for ball detection, trajectory classification, and launch angle calculation.
- Used AI-assisted development workflows to speed up implementation, improve code quality, support debugging, and produce better technical documentation.

Flutter Developer, Golden Packages (Remote/Part-Time) April 2025 – October 2025
Related Projects: RCA Shop Amman, Jordan

- Developed and maintained RCA Shop, a production e-commerce Flutter app published on Google Play and the App Store.
- Delivered business-focused features including **Deal of the Day, Featured Products, Seasonal Categories, and Product Collections** to improve product discovery and user engagement.
- **Integrated PayTabs** to support secure and smooth online payment experiences.
- Resolved **15+ performance issues** and improved checkout flow, UI consistency, performance, and release quality

Skills

Mobile (Flutter) & Architecture: Flutter, Dart, Flutter Web, Clean Architecture, MVVM, MVC, Bloc, Cubit, GetX, OOP, SOLID, Design Patterns, Data Structures & Algorithms, Localization, OWASP Mobile Top 10, Stripe, PayTabs, In-App Purchases, REST API Integration

Backend Development (Basic Level): Node.js, Express.js, CRUD endpoints, middleware basics, JWT authentication basics, error handling, MongoDB, MySQL, SQL queries

Data, APIs & Firebase: Dio, Retrofit, Hive, SQLite/sqflite, Firebase Auth, Firestore, FCM, Crashlytics, Analytics, Google Maps APIs

Tools, Testing & Delivery: Dart DevTools, Unit Testing, Widget Testing, CI/CD, Fastlane, TestFlight, App Store Connect, Google Play Console, Flavors, Git, GitHub, Azure DevOps, Xcode, Android Studio, Cursor, Codex, Antigravity

AI & Computer Vision: AI-Assisted Workflows, Claude Code, Codex, Gemini, Cursor, OpenCV, YOLOv8, TensorFlow Lite, Google ML Kit, ElevenLabs

Projects

AnonQ, Anonymous Q&A Social App (Testing Stage) | Flutter, Cubit, Clean Architecture, Firebase, RevenueCat, Node.js API

- **Watch Demo Video**
- **Led the full mobile build** of an anonymous Q&A social platform, owning the entire Flutter codebase and coordinating development with backend and UI/UX teammates.
- Delivered core social features: anonymous question sending and receiving, answer publishing to a public feed, user profiles, and a user-level blocking system.
- Integrated a server-side ML moderation service on the **client, handling flagged content**, and spam/abuse states across the app's UI flows.
- Implemented time-limited premium feature unlocks using **RevenueCat in-app purchases.**
- Built **deep linking** for shareable profile and question links, and Firebase Cloud Messaging for push notifications.
- **Applied feature-based Clean Architecture with Cubit** state management, full Arabic/English localization with RTL support, and OWASP-aligned handling of environment variables and auth tokens.

JAiME AI Golf Coach (Testing Stage) | Flutter, Python, OpenCV, YOLO, Google ML Kit, ElevenLabs

- **Watch Live Test Session**
- Developed AI-powered golf swing analysis features using Flutter, Python, YOLO, OpenCV, and Google ML Kit.
- Implemented **server-side ball detection and tracking** with YOLO and OpenCV, enhanced using Kalman Filter and ROI-based tracking.
- Built trajectory classification logic to analyze golf ball flight paths and swing patterns.
- Implemented **golfer body tracking and skeleton visualization** to monitor player movement during swing videos.
- Contributed to real-time Live Practice Sessions on mobile, providing feedback based on player movement and swing behavior.
- Integrated ElevenLabs **Text-to-Speech** for voice-based coaching feedback.

MobileHerd, Farm Management App | Flutter, REST APIs, Offline Sync, Data Structures

- **App Store**
- Built the app from scratch, delivering a production-ready mobile solution for farmers to manage animal records, events, and services.
- Implemented **offline-friendly data access and synchronization flows** to support usage in farm environments with limited connectivity.
- **Optimized large dataset handling** using suitable data structures and lookup strategies, improving app performance and loading time.

RCA Shop, E-commerce App | Flutter, PayTabs, Apple Pay, REST APIs, Multilingual Support

- **Google Play**
- **App Store**
- Developed and maintained a production e-commerce app published on Google Play and the App Store.
- Delivered business-focused features including Deal of the Day, Featured Products, Seasonal Categories, and Product Collections.
- Improved checkout experience, integrated secure payments, resolved 15+ issues, and enhanced app stability.

HD Cutz Salon, Booking Platform | Flutter, Stripe, FCM, Clean Architecture, Multilingual Support

- **Google Play**
- **App Store**
- Contributed to a **multi-app salon platform** covering customer, staff, and admin experiences.
- Integrated **Stripe payments and Firebase Cloud Messaging** to support bookings, payments, and real-time notifications.
- Applied Clean Architecture and API integration practices to improve maintainability and product scalability.

Poochiepoo, Pet Services App | Flutter, GetX, Firebase, Firestore, Stripe

- **Google Play**
- **App Store**
- Developed and improved mobile app features for pet services, payments, and user management.
- Integrated **Stripe payments** and collaborated with design, backend, and product teams to improve delivery quality.
- Redesigned key UI areas and **resolved 20+ critical performance issues**, improving performance, consistency, and stability.

Education

Bachelor's Degree in Accounting, Faculty of Commerce - Damietta University | GPA: 3.4/4.0 (B+)

Languages

Arabic — Native/Bilingual

English — Proficient
